EXP Series Light Industrial

Nortech's Express Series LCD Monitors have been engineered using the highest quality components, but geared toward price sensitive applications. These units feature quick SpeedClip mounting and optional touch screens. Available in 12", 15", 17" & 19" sizes.

Panel / ARM or Rack Mount

FPI Series Heavy Industrial

Nortech's FPI Series displays have been designed for environments where dirt, grease, grime, oil, water, dust and heat may be present. These units meet NEMA 4 standards, feature fan cooling and are available in 15", 17" 19" and 21.3" sizes.

Panel or Rack Mount

FPC Series Panel PCs

Nortech's FPC Series Panel PC is a ruggedized, totally integrated industrial biscuit PC and TFT display designed into a modular enclosure that can be easily separated for maintenance. Available with a 15", 17" or 19" LCD and customized to your specifications.

Panel / ARM Mount

FPI Series Workstations

Nortech's FPI Series integrated workstations feature heavy gauge aluminum construction for durability and easy open design for quick maintenance. Available in 15", 17" and 19" display sizes. These units are built tough.

Panel or Rack Mount

Membrane Workstations

Nortech's membrane keypad workstations offer 60 alphanumeric keys and 24 function keys integrated into the front panel. These units are fully sealed to NEMA 4 standards and offer excellent expansion to meet customer specifications.

Industrial Computers

Nortech's extensive line of industrial computers can be completely customized to your specifications. We offer small 6 slot shoebox configurations all the way up to huge 20 slot systems designed for maximum expansion.

Rack Systems

Nortech offers a large selection of rack mountable equipment ranging from rack drawer LCDs with KVM options to industrial PCs to our new line of Rack Mount Express LCDs.

Industrial Keyboards

Nortech also offers a full line of peripheral components especially designed for industrial environments. One stop shopping for all your industrial equipment needs.
